

SYSTEM PRAMETERS DESCRIPTIONS

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
ACTIVE_CLIENT_DAYS	Member can choose the no. of days in the range 0- 365 days to inactive the clients who has not been placing orders more than the given no. of days given in this column.	0-365	Effect Next Day
ADD SUSPENDED HOLDING DURING FILE UPLOAD	Y = If Member want to upload holding of suspended scrips. N =If Member doesn't want upload holding of suspended scrips.	Y/N	Immediate Effect
Adding Position validity type CF OR DAY	CF =If Member wants to add position from admin terminal in CF Position. DAY =If Member wants to add position from admin terminal in Day Position.	DAY/CF	Immediate Effect
Additional Exposue margin for NCDEX	P =To charge the pre expiry margin in nclex exchange. A =To charge the additional margin in nclex exchange.	P-Pre expiry,A-Additional long/short	Immediate Effect
Allocation of Unallocated Fund at CC	-1=Incase Member doesn't want to make use of unallocated/fungible amount lying with CC. Or mentioned the value of unallocated/fungible fund with the CC to start the de-allocation functionality.	-1	Immediate Effect
ALLOW ADDITIONAL MARGIN FOR MCX	YES = if Member wants to charge the Additional or other margin in MCX applicable from the exchange time to time. No = If Member doesn't wants to charge the Additional or other margin in MCX applicable from the exchange time to time.	YES/NO	Immediate Effect
Allow Hedge at order level witout trade execution	YES = If Member want to allow the spread/hedge order at pending order level for both the legs are pending. NO = If Member doesn't want to allow the spread/hedge order at pending order level for both the legs are pending.	YES/NO	Immediate Effect
Allow Interops For Segment	E =It allows interoperability for Equity segment.	E,D,C	Effect after restart
Allow margin 100% by default	YES = if Member wants to charge the 100% margin for order placed in Margin product like CNC product. No =if Member doesn't wants to charge the 100% margin for order placed in Margin product like CNC product.	Yes/No	Immediate Effect
Allow pledge share to sell	Y =If Member wants to allow to sell the pledge holdings. N =If Member doesn't wants to allow to sell the pledge holdings.	Y/N	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
Auto/Manual square off	Automatic = All clients INTRADAY open position will be squared off at the time of intraday square off. CLIENT = At the time intraday squared of system will check the client level setting in client master if intraday auto squared off set as AUTO in client master than all open position of INTRADAY will squared off only for those cleint who choose intraday square off as AUTO and INTRADAY open position will not be square off who choose manual. RMS = At the time intraday square off systme will check profile level, INTRADAY position will square off all clients who have mapped in a profile in which intraday square off choose as AUTO and open position of INTRADAY will not be square off those clients who have mapped in a profile in which intraday square off choose as manual.	Automatic/Manual/CLIENT/RMS	Immediate Effect
AUTO_DEAL_CLIENT_MAP_FLG	YES = If Member creating clients for a branch and to map default in a dealer. No = If Member doesn't want to map client default.	YES/NO	Effect after restart
Block Intraday product during square off	Automatic =If Member wants to block INTRADAY product automatically at the time of square off. Manual = if Member doesn't wants to block INTRADAY procutt automatically.	Automatic/Manual	Immediate Effect
Block option commodity contracts based on OI	Provision to enter no. of lots of market wide open interest, new order will be blocked till the mentioned no. of lots. -1 = If Member wants to allow order for all contracts irrespective of any OI.	-1 - 100000(-1 to ignore OI check)	Immediate Effect
Block option currency contracts based on OI	Provision to enter no. of lots of market wide open interest, new order will be blocked till the mentioned no. of lots. -1 = If Member wants to allow order for all contracts irrespective of any OI.	-1 - 100000(-1 to ignore OI check)	Immediate Effect
Block option index contracts based on OI	Provision to enter no. of qty of market wide open interest, new order will be blocked till the mentioned no. of qty. -1 = If Member wants to allow order for all contracts irrespective of any OI.	-1 - 100000(-1 to ignore OI check)	Immediate Effect
Block option stock contracts based on OI	Provision to enter no. of qty of market wide open interest, new order will be blocked till the mentioned no. of qty. -1 = If Member wants to allow order for all contracts irrespective of any OI.	-1 - 100000(-1 to ignore OI check)	Immediate Effect
Block Product Not in Basket	I =System will check the basket assigned at profile level and will allow/reject the Intraday product order as per basket. M =System will check the basket assigned at profile level and will allow/reject the Margin product order as per basket.	I-intraday,M-Margin	Immediate Effect
Block T1 selling	Y =If Member wants to block T1 holding sell. N =If Member doesn't wants to block T1 holding sell.	Yes/No	Immediate Effect
BUFFER PERCENTAGE WHILE PULLING FUND FOR NON COMPETATIVE BIDDING	Provision to enter % to pull extra fund for NCB	1-100%	Immediate Effect
BUFFER PERCENTAGE WHILE PULLING FUND FOR SOVERIAN GOLD BOND	Provision to enter % to pull extra fund for SGB	1-100%	Immediate Effect
BUFFER PERCENTAGE WHILE PULLING FUND FOR SIP	Provision to enter % to pull extra fund for SIP	1-100%	Effect after restart
CHANGE STATUS FOR CLOSE IPO	YES =Closed IPO will not be shown in front end list to clients.	Yes/No	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
CHARGE HIGHER MARGIN FROM BASKET AND EXCH VAR FOR THE PRODUCT	Provision to choose the product in which Member wants to charge higher margin either basket margin or VAR+ELM. If wants to multiple product then mentioned the product separated with comma i.e. I,M,V,B . NA = If Member wants to charge only basket margin or (only var elm without mapping the basket)	I-INTRADAY,M-MARGIN,F-MTF,V-COVER,B-BRACKET,NA-NOT_APPLICABLE	Immediate Effect
Charge Physical Margin as VAR ELM for option buy product wise	Provision to choose the product in which Member wants to charge physical margin in option buy ITM contract position. If wants to multiple product then mentioned the product separated with comma i.e. I,M,V,B . NA = If Member doesn't wants to charge Physical margin.	I-Intraday,M-Margin,V-CO,B-BO,NA-Not Applicable	Immediate Effect
Check Hedge Margin At Sq-OFF Position	YES =System will verify the sufficient margin before squaring off the hedge/spread position to break the hedge/spread. No =System will allow the square off without checking the sufficient margin.	YES/NO	Immediate Effect
CHECK SCRIP IN BASKET IN FnO FOR PRODUCT	I =System will check the basket assign at profile level and will allow/reject the Intraday product order as per basket. M =System will check the basket assign at profile level and will allow/reject the Margin product order as per basket. NA =System will not check the basket at profile level for any product.	I,M,H,NA	Immediate Effect
CHECKS SCRIP BLOCK DURING HOLDING SELL	Y =System will check scrip block master for the scrip in which an Member/client is placing order in blocked scrip and will reject the order. N =System will allow holding sell to all scrip.	Y/N	Immediate Effect
Circuit Thresold Auto Sq-off Enable	YES =If Member wants to square off all INTRADAY position automatically of the scrips which are moving towards the circuit when set threshold percentage has been reached. No =If Member doesn't wants to square off all INTRADAY position automatically of the scrips which are moving towards the circuit when set threshold percentage has been reached.	YES/NO	Immediate Effect
Clearing Member For MTM and Intraday SQ-off	Member needs to select Exchange NSE/BSE for squaring off the Equity position in case of interoperability.	NSE/BSE	Effect after restart
COLLATERAL CALCULATE ACCORDING TO LTP OR CLOSE PRICE	N =Collateral value will be calculated on LTP. Y =Collateral value will be calculated on LTP or Closing price which ever is lower.	Y/N	Immediate Effect
COLLATERAL_PERC_FLAG(HAIRCUT % OR HLD FILE %)	YES =Haircut will take from holding file to calculate collateral. No =Haircut will take from exchange haircut file to calculate collateral.	Yes/No	Immediate Effect
Combined limit flag	NO =If Member wants to use commodity segment seperatly in limit. YES =If Member wants to use all segment combined for limit.	Yes/No	Effect after restart
Consider Buy Avg Zero During Position Upload	YES =If Member want to upload option buy position with average price 0. No =If Member doesn't want to upload option buy position with average price 0.	Yes/No	Effect after restart
Consider CNC MTF Sell During Fund Allocation	YES =If Member wants to send allocation for Holding sold in CNC and MTF product. No =If Member doesn't wants to send allocation for Holding sold in CNC and MTF product.	YES/NO	Immediate Effect
Consider MTM Loss in Limit	Yes =If Member wants to deduct the MTM loss from available trading limit. No =If Member doesn't wants to deduct the MTM loss from available trading limit.	Yes/No	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
Consider Option Buy Utilize During Fund Allocation	YES =If Member wants to send allocation for option buy premium. No =If Member doesn't wants to send allocation for option buy premium.	YES/NO	Immediate Effect
Default_admin	Provision to enter default admin ID from which MTM and INTRADAY auto square off will generate.	Default Admin	Effect after restart
default_password	Provision to given default password which will be applicable for the all Member/client at the time of reset password.	Default Password(max 20 Character)	Immediate Effect
EDIS_CHECK_SOURCE	Member needs to enter the source code in which EDIS should be check at the time of holding sell from the mentioned source code.	MRG,T1,HLD,MTF,MTFT	Immediate Effect
Enable disable POA checks for admin	YES = If Member doesn,t wants to sell holding of non poa clients from Admin Member. NO = If Member doesn,t wants to sell holding of non poa clients from Admin Member.	Yes/No	Immediate Effect
Enable MTF Pledge Request Call during pre MTF Buy	YES = If Member wants to take pledge request for MTF before placing the buy order in MTF product. No =If Member wants to allow MTF buy order without taking pledge request.	Yes/No	Immediate Effect
Enable Surveillance Measures	Member needs to enter the surveillance code mentioned in possible input with surveillance description to enable the trade in a scrip under mentioned surveillance measure.	25 promoters encumbrance 26 promoters/non-promoters encumbrance 50 ASM1/GSM0 51 ASM2/GSM0 52 ASM3/GSM0 53 ASM4/GSM0 54ASM1/GSM0 55 ASM2/GSM0 56 promoters/non-promoters encumbrance/GSM0 57 promoters encumbrance/GSM0 58 IBC1/GSM0 59 IBC2/GSM0 60 ICA1/GSM0 61 ICA2/GSM0 62 IBC0/GSM0 63 IBC0/GSM1 64 IBC0/GSM2 65 IBC0/GSM3 66 IBC0/GSM4,NA	Effect Next Day
ENABLE_ASM_STAGES	Member needs to enter the stage Nos. in which he wants to allow trade of scrips under ASM category across exchange.	0,1,2,3,4,5,6	Effect after restart
ENABLE_CREATE_HOLDING_WATCHLIST	Y =If Member wants to allow end clients to create watch list from front end. N =If Member doesn't wants to allow end clients to create watch list from front end.	Y/N	Immediate Effect
Enable_Disable_position_conversion	Yes =If Member wants to enable the position conversion. No = If Member doesn't wants to enable postion conversion.	Yes/No	Effect after restart
ENABLE_GSM_STAGES	Member needs to enter the stage nos. in which he wants to allow trade of scrips under GSM category across exchange.	0,1,2,3,4,5,6	Effect after restart
ENABLE_IBC_CATEGORY	Member needs to enter the stage nos. in which he wants to allow trade of scrips under IBC category.	0,1,2,NA	Effect Next Day

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
ENABLE_ICA_CATEGORY	Member needs to enter the stage nos. in which he wants to allow trade of scrips under ICA category.	0,1,2,NA	Effect Next Day
ENABLE_ILLIQUID_SCRIPS	YES = If Member wants to allow trade in ILLIQUID scrips as published by exchange. NO = If Member doesn't wants to allow trade in ILLIQUID scrips as published by exchange.	YES/NO	Effect after restart
ENABLE_IRP_CATEGORY	Member needs to enter the stage nos. in which he wants to allow trade of scrips under IRP category. NA = If Member doesn't want to allow any stage.	0,1,2,NA	Effect Next Day
Enable_NSE_ASM_GSM_Upload_From_Security_File	YES =It should be yes by default because ASM GSM flagging would be picked up from exchange security file.	YES/NO	Effect after restart
ENABLE_SOCIAL_MEDIA_PLATFORMS	Member needs to enter the stage nos. in which he wants to allow trade of scrips under Social Media Platform. NA = If Member doesn't want to allow any stage.	2,NA	Effect Next Day
ENABLE_UNSOLICITED_SMS_CATEGORY	Member needs to enter the stage nos. in which he wants to allow trade of scrips under Unsolicited SMS category. NA = If Member doesn't want to allow any stage.	0,1,NA	Effect Next Day
EQ_FUND_ALLOC_BUFFER_PERC	Provision to enter a % which Member wants to send extra allocation of utilized margin in Equity	0-100%	Immediate Effect
FNO_FUND_ALLOC_BUFFER_PERC	Provision to enter a % which Member wants to send extra allocation of utilized margin in Fno and Currency.	0-100%	Immediate Effect
FOS_PAYIN_TIME	Provision to mention cut off time of back office to capture/update fund in BOD.	YYYY-MM-DD HH:MM:SS	Immediate Effect
Fund Transfer Default Segment for Allocation	Set the vaule of segment in which Member wants to allocate transferred payin amount. CM =Equity Segment, FO =FnO, CD =Currecy Segment	CM/FO/CD/NA	Immediate Effect
Hedge Benefit Remove For Currency Prior To Expiry Days	Member needs to enter the no. of days(calender days) to see the effect after removal hedge benefit from utilized margin in Currency segment. -1 = If Member doesn't wants to remove hedge benefit.	-1 for disable,0/1/2/3/4/5-for current/previous/2/3/4/5 Calendar days from expiry day	Immediate Effect
Hedge Benefit Remove For Derivative Prior To Expiry Days	Member needs to enter the no. of days(calender days) to see the effect after removal hedge benefit from utilized margin in equity derivative segment. -1 = If Member doesn't wants to remove hedge benefit.	-1 for disable,0/1/2/3-for current/previous/2/3/4/5 Calendar days from expiry day	Immediate Effect
HOLDING_WATCH_LIST_NAME	Member needs to mentioned default holding watch list name for front end.	MY_WATCHLIST	Immediate Effect
Intraday allowed for NRI	Y = If Member want to allow trade in INTRADAY product to NRI client. N = If Member doesn't want to allow trade in INTRADAY product to NRI client.	Y/N	Immediate Effect
Intraday Product by Default	YES =If Member wants to allow trade in Intraday product. No =If Member doesn't wants to allow trade in Intraday product.	Yes/No	Immediate Effect
Intraday square of slicing type	L =If Member wants to place Intraday auto square off order at LTP. D = If Member wants to place Intraday auto square off order at DPR.	L - LTP & D - DPR	Immediate Effect
Intraday SquareOff Order Validity	DAY =If Member wants Intraday auto square off orders validity as DAY. IOC =If Member wants Intraday auto square off orders validity as IOC.	DAY/IOC	Effect after restart

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
Login type(N- Normal, M-Multi,S-sourcewise)	M =If Member wants to give multi login facility for clients. N = If Member wants normal login facility for client.	M,N,S	Effect after restart
MCX_EXPOSER_PERC_FACTOR	Member needs to enter the value indicator to charge the Margin in MCX as given..... (D,T,A,NA) D=Delivery_Margin,T=Tender_marg,A=Additional_marg,NA=Only for ELM_long	(D,T,A,NA)D=Delivery_Margin, T=Tender_marg,A=Additional_marg,NA=Only for ELM_long	Immediate Effect
MFD_CLIENT_UPLOAD_ENABLE_DISABLE	Yes =If Member wants to upload MF client master through a file seperately. No =If Member doesn't wants to upload MF client master through a file seperately.	Yes/No	Immediate Effect
MTFT_SELL_MRG_PERC	Member need to enter the margin % which he wants to charge on MTF T1 selling or -1 = For charging VAR + ELM by default	for Var Elm -1 else Sell Mrg Perc	Immediate Effect
MTFT_SELL_WITH_MTFT_COLL	YES =If Member wants to sell MTF T1 holding against the MTF T1 holding collateral. No = If member wants to sell holding only on cleare ledger balance.	YES/NO	Immediate Effect
MTFT_UPLOAD_AS_HOLDING_OR_POSITION	P =If Member wants to upload MTF T1 scrips as position. H =If Member wants to upload MTF T1 scrips as Holding.	H-Holding/P-Position	Immediate Effect
Mtm Increment Percent For Mail And Msg	Member needs to enter the incremental mtm % at which he wants to send alert mails and msgs.	1-100%	Immediate Effect
NAME_OF__DEFAULT_WATCHLIST	Member needs to enter the name of watch list which will be shown at front end clients login.	MY_WATCHLIST	Immediate Effect
NCB_Bidding_Start_Time	Provision to define Non-competitive Bidding Start Time	HH:MM:SS	Effect after restart
NCB_Bidding_Stop_Time	Provision to define Non-competitive Bidding Stop Time	HH:MM:SS	Effect after restart
No of day to block long dated COM option contract(-1 to ignore check)	Member need to enter the no. of days. Order will not be allowed in such contract If expiry date is out side the entered no. of days in commodity segment. -1 = all contract will be allowed to trade.	-731	Immediate Effect
No of day to block long dated CUR option contract(-1 to ignore check)	Member need to enter the no. of days. Order will not be allowed in such contract If expiry date is out side the entered no. of days in currency segment. -1 = all contract will be allowed to trade.	-731	Immediate Effect
No of day to block long dated FNO option contract(-1 to ignore check)	Member need to enter the no. of days. Order will not be allowed in such contract If expiry date is out side the entered no. of days in FnO segment. -1 = all contract will be allowed to trade.	-731	Immediate Effect
NO_DAYS_TO_CLEAR_BKP_DATA	Provision to enter the no. of days to keep the back up data for the mentioned no. of days. (max no. of days 30 only)	0-30	Immediate Effect
Non register bank upload for mf client	YES =If Member wants to upload non-supported banks of BSE STAR MF for MF clients. No =If Member doesn't wants to upload non-supported banks of BSE STAR MF for MF clients.	YES/NO	Immediate Effect
NRI_CREATION_ALLOW	Y = If Member wants to allow create NRI client. N = If Member doesn't wants to allow create NRI client.	Y/N	Immediate Effect
OPT_IDX_STRIKE_PERCENTAGE	If Member wants to set the range of strike price for order placement then needs to enter % of strike price for Index option derivative. Order will only be allowed within the range of mentioned strike percentage.	1-100%	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
OPT_MARG_BLOCK_ON_CLOSE_PRICE	NO =If Member wants to maintain option buy price in system itself. YES =If Member wants to avg price as close price for option buy value.	YES/NO	Effect after restart
OPTION STRIKE PERCENTAGE FOR COMMODITY	If Member wants to set the range of strike price for order placement then needs to enter % of strike price for Index option commodity. Order will only be allowed within the range of mentioned strike percentage.	1-100%	Immediate Effect
OPTION STRIKE PERCENTAGE FOR CURRENCY	If Member wants to set the range of strike price for order placement then needs to enter % of strike price for Index option currency. Order will only be allowed within the range of mentioned strike percentage.	1-100%	Immediate Effect
Option strike price range check should work or not	A = If Member wants to check strike price range for both buy and sell order. B =If Member wants to check strike price range for Buy order only. S =If Member wants to check strike price range for Sell order only. N =if Member doesn't want to check strike price range for both Buy and Sell order only and want to allow order to all strike price.	A, B, S, N	Immediate Effect
orders to be blocked or not once mtm sqoff has reached	YES = If Member wants to block new orders if set MTM % of squared off at profile level has been reached. No =If Member doesn't want to block new orders if set MTM % of squared off at profile level has been reached.	YES/NO	Immediate Effect
orders to be blocked or not once mtm warning has reached	YES = If Member wants to block new orders if set MTM warning % at profile level has been reached. No =If Member doesn't want to block new orders if set MTM warning % at profile level has been reached.	YES/NO	Immediate Effect
PAN and DOB flag	E =It enables two factor authentication for front end applications. D = It disabled two factor authentication for front end applications.	E/D	Effect after restart
password_expiry_days	Provision to enter no. of days to expire the password default.	15-N days	Effect after restart
Pay Out Availability Time	Provision to enter time range in which Member wants to accept payout entries from front end Members.	start time-End time(00:00:00-23:59:59)	Effect after restart
PAYIN_UPDT_ON_LIMIT_UPLD	YES = If Member wants to capture/update fund after backoffice cutoff time automatically in BOD. NO = If Member doesn't want to capture/update fund after backoffice cutoff time automatically in BOD.	YES/NO	Effect after restart
Pledge_Start_Time	Provision to mention the start time from which system will start the collecting request of pledge.	HH:MM:SS	Immediate Effect
Pledge_Stop_Time	Provision to mention the stop time from which system will stop the collecting request of pledge.	HH:MM:SS	Immediate Effect
POA Enabling Type	Provision to mention DP from where EDIS will be verified.	CDSL,NSDL,NA	Effect after restart
position file upload from BSE to NSE	YES = If Member wants to upload position as NSE position from ICCL files.	YES/NO	Immediate Effect
POSITION ROLLOVER FLAG	NO =If Member doesn't want to allow roll over the position of securities under BAN period. YES =If Member wants to allow roll over the position of securities under BAN period.	Yes/No	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
Product Wise ASM Blocking	Member needs to enter the product type indicator in which they want to allow order in the ASM stages as set in sysparameter check. C-CNC,I-Intraday,M-Margin,V-CO,B-BO,A-ALL System will allow order in all ASM stages in the product which Member doesn't mention here.	C-CNC,I-Intraday,M-Margin,V-CO,B-BO,A-ALL	Immediate Effect
Product Wise GSM Blocking	Member needs to enter the product type indicator in which they want to allow order in the GSM stages as set in sysparameter check. C-CNC,I-Intraday,M-Margin,V-CO,B-BO,A-ALL System will allow order in all GSM stages in the product which Member doesn't mention here.	C-CNC,I-Intraday,M-Margin,V-CO,B-BO,A-ALL	Immediate Effect
Profile id	Provision to mention default Risk profile code.	Risk Profile (max 15 Character)	Effect after restart
RANDOM PASSWORD LENGTH	Provision to enter the length of default password.	Default Password(max 20 Character)	Immediate Effect
REAL_TIME_PLEDGE	Y =If Member wants to give the benefit of pledge value immediatly after initiating pledge. N =If Member doesn't wants to give the benefit of pledge value immediatly after initiating pledge.	YES/NO	Effect Next Day
RECOMPUTE POSITION WHILE UPLOAD SPAN FILE	YES =If Member wants to recompute the margin of all client immediatly after uploading span file every time at an interval. No =If Member doesn't wants to recompute the margin of all client immediatly after uploading span file every time at an interval.	YES/NO	Immediate Effect
RUN DATA ARCHIVAL PROCESS ON SATURDAY	Y =Data archival process will run on Saturday with EOD BOD. No =Data archival process and EOD BOD will not run on Saturday.	Y/N	Effect After 2 Days
Segment wise limit flag	SEPARATE = If Member wants to use segment wise limit facility. ALL =If Member want to use combined limit facility.	Separate/All	Effect after restart
Send Allocation in morning For all ICCL clients from file	Yes = If Member wants to send allocation in BOD before market opens of all the clients having open position in Derivatives segment. No = If Member doesn't wants to send allocation in BOD before market opens of all the clients having open position in Derivatives segment.	YES/NO	Immediate Effect.
Session checking flag	Y =If Member want system to check login session to time out. N =If Member doesn't want system to check login session to time out.	N , Y	Effect after restart
Session time out (in Sec.)	Provision to enter the seconds after which User should be time out and User will be locked.	300-N Sec	Effect after restart
SGB_Bidding_Start_Time	Provision to define Sovereign Gold Bond Bid Start Time	HH:MM:SS	Immediate Effect
SGB_Bidding_Stop_Time	Provision to define Sovereign Gold Bond Bid Stop Time	HH:MM:SS	Immediate Effect
Source Wise collateral For Limit	Member needs to mention the source code from which collateral value need to be allow for trading limit.	HLD,MRG,T1,MTF,MTFT,MF,N A	Immediate Effect
Source Wise collateral For MTM	Member needs to mention the source code from which collateral value need to be allow for MTM calculation.	HLD,MRG,T1,MTF,MTFT,MF,N A	Immediate Effect

Parameter check Name	Input Value with description	Possible Input	Mode Of Effect
Strike percentage	If Member wants to set the range of strike price for order placement then needs to enter % of strike price for stock option derivative. Order will only be allowed within the range of mentioned strike percentage.	1-100%	Effect after restart
STRIKE_PRICE_RANGE_ENABLE_PRODCT	Member needs to enter the product type indicator in which strike range should not be check and order will be allowed for all strike prices.	I-Intraday,M-Margin,V-Cover_Order,B-Bracket_Order,NA-no set	Immediate Effect
SYS_Maker_Checker_Flag	YES =If Member wants to start MAKER CHECKER functionality for admin Members. No =If Member doesn't want to start MAKER CHECKER functionality.	Yes/No	Immediate Effect
SYS_OPT_FUT_BLK_CHECK	YES = If Member wants to set limit for future and options in equity derivative. No = If Member doesn't want to set limit for future and options in equity derivative.	yes/no	Immediate Effect
T1_SELL_MRG_PERC	Member need to enter the margin % which he wants to charge on T1 selling or -1= For chargin VAR + ELM by default	for Var Elm -1 else Sell Mrg Perc	Immediate Effect
T1_SELL_WITH_T1_COLL	YES =If Member wants to sell T1 holding against the T1 holding collateral. No = If member wants to sell T1 holding only on clear ledger balance.	YES/NO	Immediate Effect
Threshold percentage for DPR band to Block & Square off	Member needs to enter the threshold % of DPR band at which circuit block will enabled and position will be shown in ckt breach position window and new order will be block for INTRADAY and CO BO product. -1=functionality will disabled.	1-100%,-1 for disable	Immediate Effect
Threshold percentage for DPR band to Unblock	Member needs to enter the threshold % of DPR band at which circuit block will disabled and new order will be allowed for INTRADAY and CO BO product. -1=functionality will disabled.	1-100%,-1 for disable	Immediate Effect
TOTAL_NUMBER_OF_DEFAULT_WATCHLIST	Provision to enter a no of default watch list which will be available to front end client.	0/1/2/3/4/5/6/7	Effect after new client created not existing one
Trade To Trade Series	Provision to entered all the series only which will be identified as T2T series by the system and system will behave accordingly for all the scrip which come under mentioned series here.	BT,BE,T,Z,ZT,DT,XT,MT	Immediate Effect
UnPledge_Start_Time	Provision to mention the start time from which system will start the collecting request of Un-pledge.	HH:MM:SS	Effect after restart
UnPledge_Stop_Time	Provision to mention the stop time from which system will stop the collecting request of Un-pledge.	HH:MM:SS	Effect after restart
Use of normal and MTF collateral or combined collateral	YES =If Member wants to use Normal holding collateral and MTF collateral as combined collateral. No =If Member doesn't wants to use Normal holding collateral and MTF collateral as combined collateral	YES/NO	Immediate Effect
Watchlist_scrip_number	Provision to enter the no. which is applicable to front end Member to allow add max no. of scrip in a wachlist.	25	Effect after restart
